

COLONISTS

whose ancestry is given in the Royal Ancestry Bible

Note: Most persons listed here were American colonists. Also listed are some children of colonists who both have royal ancestry and some parents or grandparents of colonists, along with a few other beginning persons on charted lines. Most of those listed have proven or probable royal ancestry. Those with lines that are more tentative or that are only possibilities are shown in *italics*. See the full INDEX (225 pages), the APPENDIX (which follows the Index), and the PEDIGREE CHARTS (with notes) for additional details. End numbers refer to the Pedigree Charts, and end names refer to the Appendix. An effort has been made to include all colonists who have royal ancestry and who have at least 20,000 American descendants.
